

### **Newly improved learning objective**

Given a randomly generated list of mammals, freshman college students will correctly identify the species of ten animals from the list without error within ten minutes.

### **Drafts for Assignment #4**

**Goal:** students will develop a technical overview of the HTML programming language.

**Learning Objective:** during a one week time frame, each student will prepare a report comparing and contrasting HTML to JavaScript and Java and it must include at least 10 comparisons or contrasts.
